- 11.5 to 13.5 market cap.

Certainty in Worker Selection
& Monitoring

We provide
workforce certainty.

Certainty in Worker Selection
& Monitoring

Or in Other Words
Workforce Compliance.

But
Workforce
Compliance
is Boring.

Certainty in Worker Selection
& Monitoring

Compliance is really just using the right worker and doing the required job competently & safely.

Efficient use of labour is not so boring when...

*The efficient use of a businesses workforce is
the most productive method to increase
profit.*

up to 70% of business cost is labour.

Not so boring when...

you can lose millions.

TikForce is a Human Resource & Compliance technology business that provides portable worker credentials that are;

- Accessed On Any Device (Smartphone, Tablet, Desktop)

- History

The **Tik.me** mobile WorkPass is the fastest and easiest way for workers and employers to deliver workforce compliance in a frictionless, always available & disruptively low cost way.

Show

- Carry your credentials with you
- Show your ID
- Show your work readiness documents

Share

- Instantly share ID or individual documents
- Streamlined process reducing delays
- Frictionless compliance
- Add on Task & Track Features

Secure

- Verified ID facial recognition
- Data encrypted & securely stored
- Worker controlled access

Example: Uber Solution

Bulk Validation of Drivers & Vehicle Tracking

U B E R Drivers in Australia

20,000

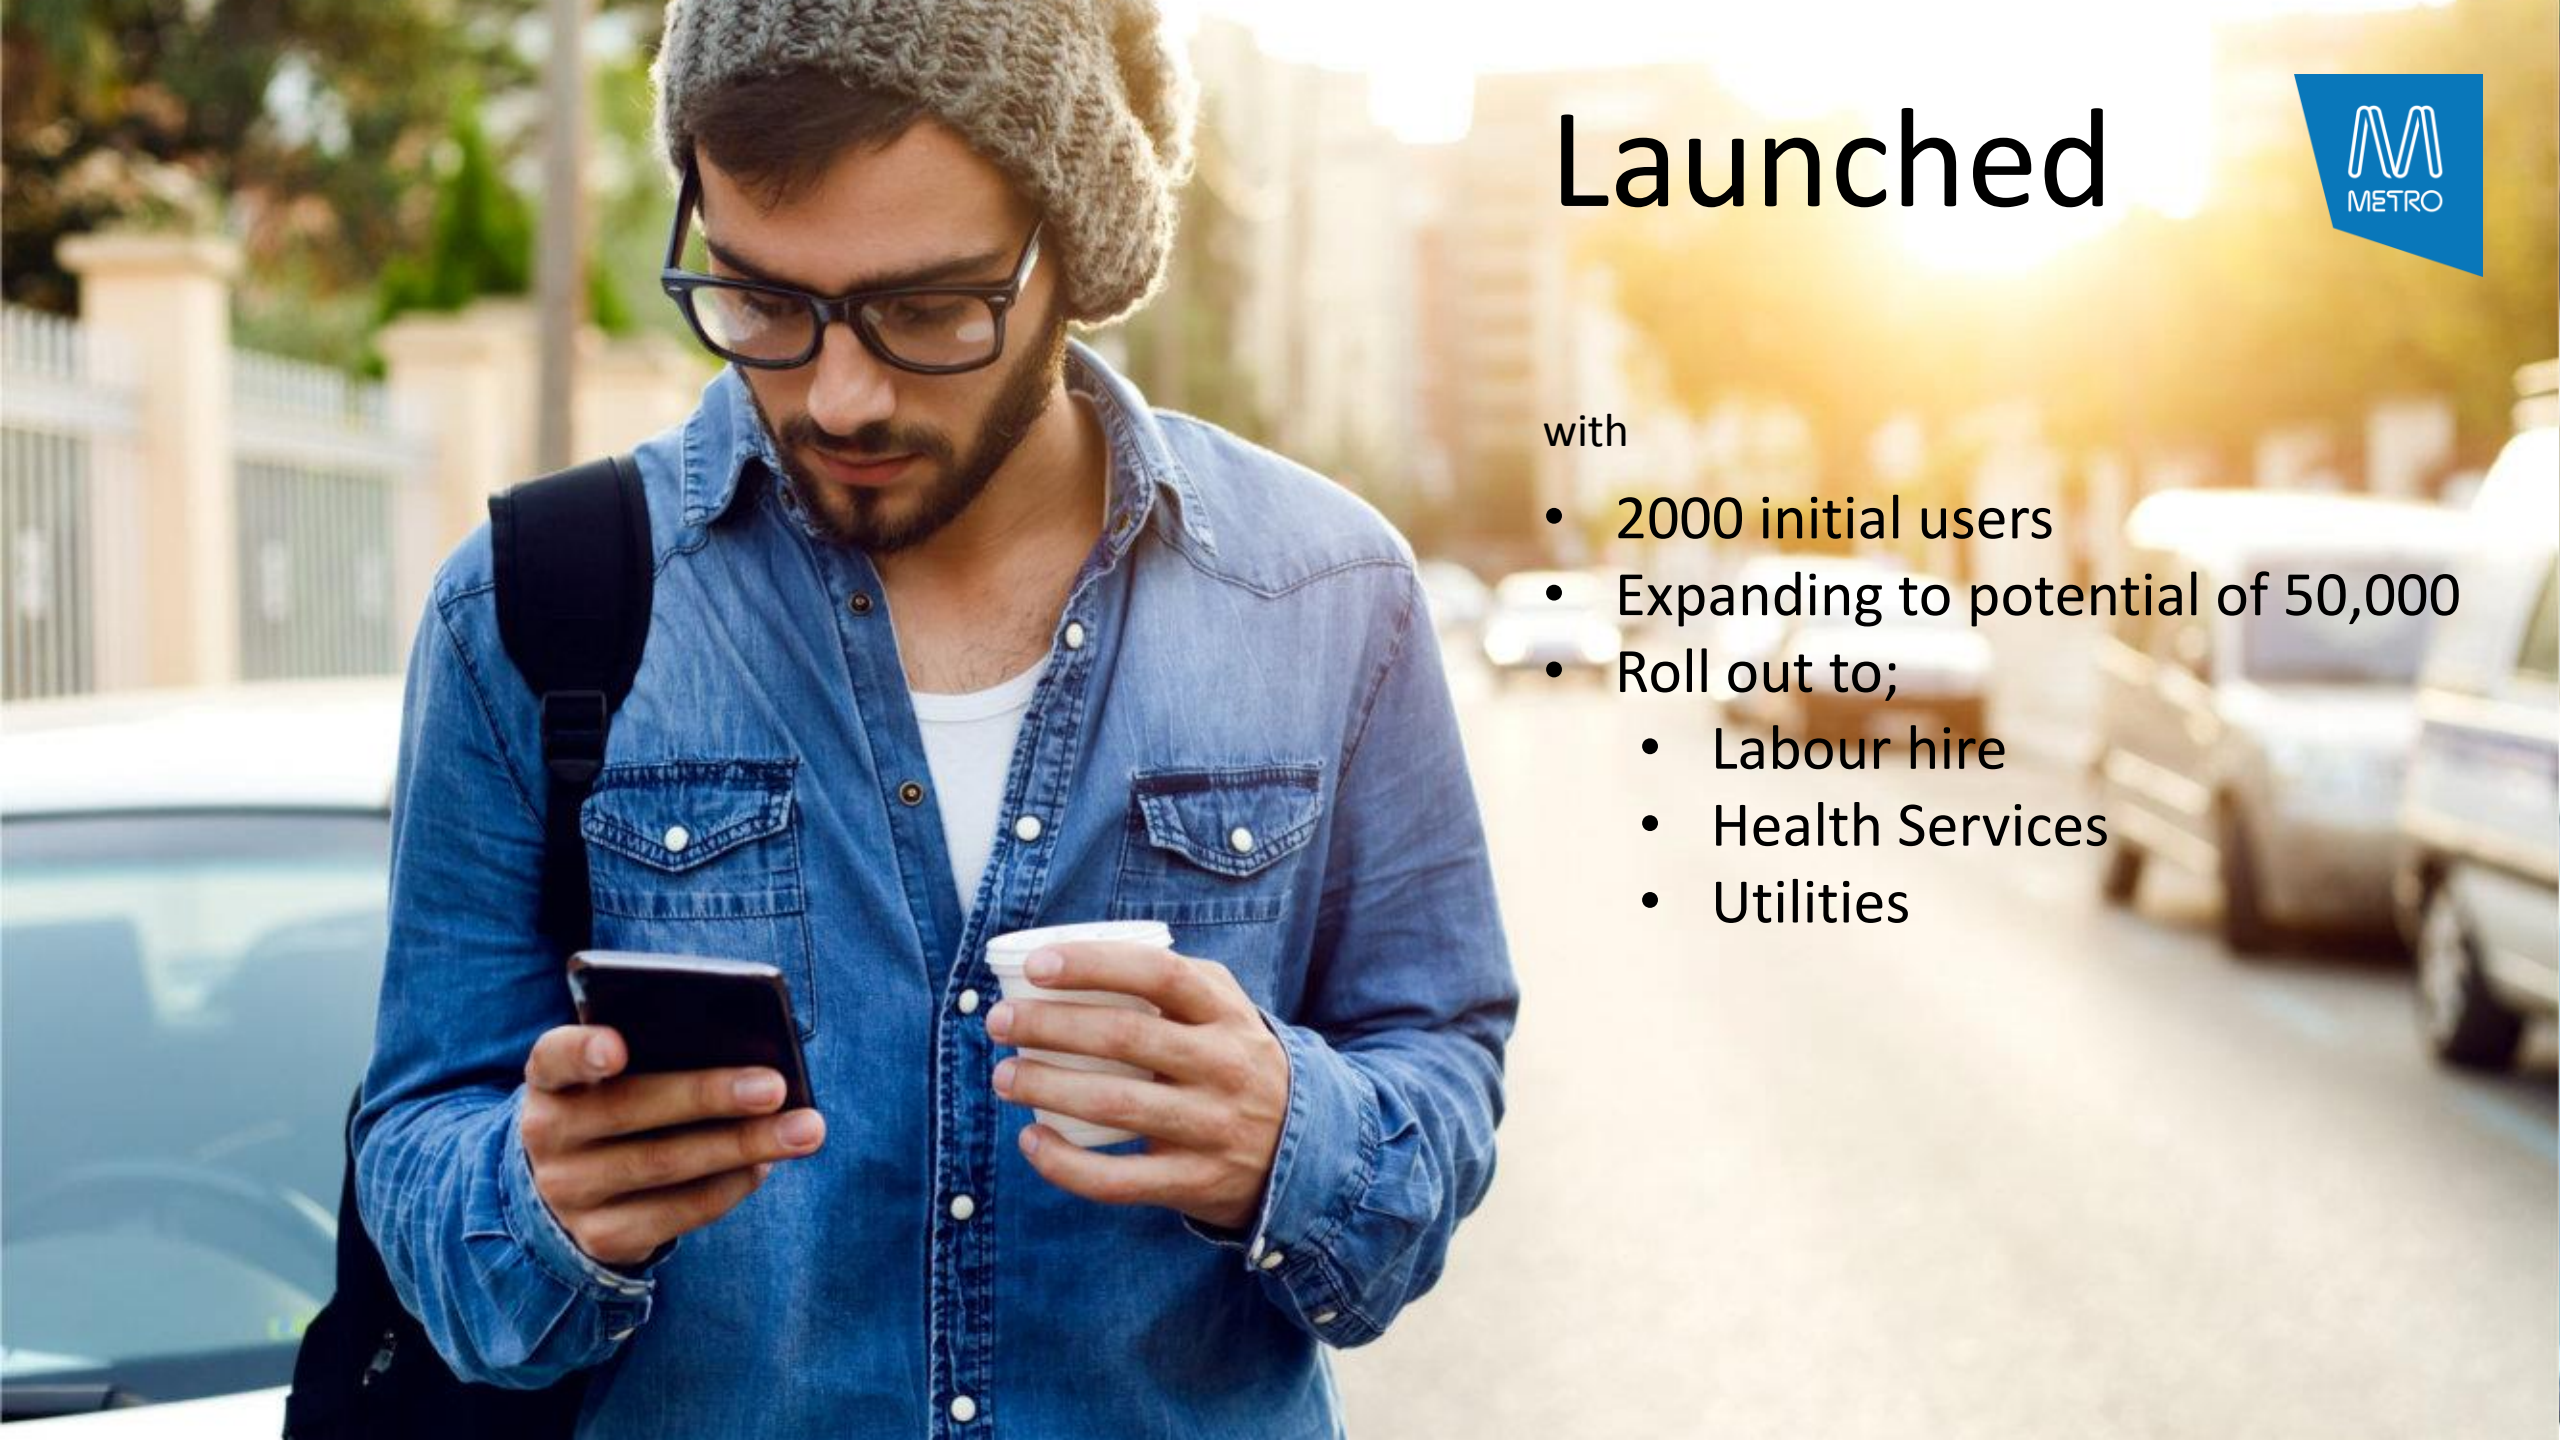

- Uber needs to have a workforce with validated licenses, police checks, etc.
- Uber needs to be able to efficiently communicate the quality of its workforce to the market
- Uber currently has ad hoc and expensive manual processes to validate drivers
- Currently Uber has no ongoing or real-time monitoring of compliance
- **TikForce** can, with its **TikMe** & **TikTraks** products, deliver both **driver validation** and **vehicle metrics** on sign up, and **ongoing**.
- **TikMe** can alert Uber & driver if they are going to have an issue such as license expiring or change to police clearance with periodic checking
- **TikTraks** can alert Uber on vehicle & driver performance with information such as engine-braking and speed issues.
- **TikForce** can provide custom on-boarding wizard or integrate with client developed via APIs

- Secure and safe
- User owned & managed
- Build credentials for life
- Control who sees what and when
- Full transaction history
- See only what you need
- Lower cost
- Faster
- Advanced integration option
- Validated resumes
- Legal Insurance protection
- Customised on-boarding wizard
- Link credentials requirements to positions
- New integrated validation being added

Is different.

Launched

with

- 2000 initial users
- Expanding to potential of 50,000
- Roll out to;
 - Labour hire
 - Health Services
 - Utilities

Business Model

Subscription & Transactional

\$5.00 per worker per month - Validated resume and credentials

\$5.00 per connection per month – Access and monitor worker profile and validated credentials

Expect between \$15.00 & \$25.00 per worker per month

Transactions vary from a few cents to \$100 or more

Example

Pool of 50,000 with average of three employer connection would generate \$1,000,000 per month

This excludes transaction income such as police checks, driver history etc. Which bill at approximately \$65.

Break Even Point Estimated

We expect to be cash flow positive at approximately 27,000 users

At that point we will be generating over \$400,000 per month

Thank you...
